Do. C.—Showing working of the Mark System	76 & 77
Do. D.—Showing the nature of the crimes for which convicts were imprisoned.	78 to 93

No. 3062 OF 1903.

From

H. N. ALEXANDER, Esquire,
Inspector-General of Prisons,
Bombay Presidency,
Poona;

To

THE SECRETARY TO GOVERNMENT,
Judicial Department,
Bombay.

*Inspector-General of Prisons' Office,
Poona, 22nd April 1903.*

SIR,

I have the honour to submit the Annual Administration Report, together with the usual statistical tables, on the Prisons and Jails of the Bombay Presidency (including the Province of Sind and the Settlement of Aden) for the year 1902. From the 19th July to the 18th October I was absent on privilege leave and during this period Major James Jackson, I. M. S. officiated as Inspector-General of Prisons.

JUDICIAL.

2. During the year under report the number of Central, District, Special and Extramural Prisons has undergone no change. The arrangement of grouping together the statistics of all the 3rd Class Subsidiary Jails with those of Lock-ups has been continued in this report.

3. From the general summary which precedes the statements in the appendices to this report it will be seen that the total population of all classes of prisoners confined in Prisons, Subsidiary Jails, Lock-ups and Civil Jails during the year 1902 has been 102,620 as compared with 101,191 in the year 1901—an increase of 1,429. The daily average population has been 11,602, which shows a fall of 385 when compared with the figures of the year previous. There has been a decrease of 633 convicts in prisons under "admissions" which will be commented upon hereafter.

4. The following table, which compares the figures of the past two years, Statement No. I.—Number refers to the admissions of convicts into Prisons and and disposal of convicts. 1st and 2nd Class Subsidiary Jails only :—

				1901.			1902.		
				Males.	Females.	Total.	Males.	Females.	Total.
Number remaining on last day of previous year.	Prisons	...	...	10,225	252	10,477	9,295	278	9,573
	Jails	...	...	498	40	538	345	15	360
Imprisoned during the year.	Prisons	...	...	15,478	1,245	16,723	14,940	1,150	16,090
	Jails	...	...	3,758	408	4,166	2,938	321	3,259

	Jails	...	...	4,256	448	4,704	3,283	336	3,619
Grand Total				29,959	1,945	31,904	27,518	1,764	29,282
Daily average number				10,115	307	10,422	9,740	313	10,053

5. With the exception of the Common Prison, the House of Correction, Bombay, the Central Prison of Ahmedabad and the District Prison of Shikárpur there has been a decline in the number of convicts admitted into our Prisons during the year under report. No reason is assigned for the increase of 271 in the number of prisoners admitted into the Common Prison, but it is probably due to the increased activity shown by the Police in dealing with offences under Local and Police Acts, alluded to further on. The increase in the House of Correction is accounted for by the suspension of admissions for a time into the Common Prison. The increase of 347 prisoners in the Central Prison of Ahmedabad is to a certain extent accounted for by the dearness of food grains in that District. The increase of 188 under "admissions" in the Shikárpur Prison is probably due to certain talukas having been transferred from the Karáchi to the new Lárkhána District. The decrease is most marked in the Central Prison of Yeraoda, the Special Prison of Thána and the District Prison of Bijápur. The net decrease of 633 may be accounted for by the fall in the prices of food grains.

6. With regard to the disposal of prisoners there is a decrease of 229 in the number of prisoners transferred, due to the smaller average number of prisoners confined, the decline in the number of admissions and to my making as few transfers as possible towards the close of the year so as to facilitate the work in connection with the Coronation releases. 144 males and 15 females, making a total of 159, were sent on 24th September 1902 in the Royal Indian Marine Steamer "Canning" to the Andamans as compared with 184 in the year 1901. The number released under the remission rules shows an increase which is due to the prisoners sent to the Prisons for failing to furnish security having been allowed the benefits of the mark system. Two prisoners were released on grounds of sickness, one from the House of Correction, Bombay, and the other from the Central Prison of Ahmedabad. 32 prisoners were released on "other grounds." Of these there were 7 ex-military convicts who were sent to England from the House of Correction a few days prior to their release. Five permanently unfit transports were released from Yeraoda. One female transport was set at liberty from the Thána Special Prison. In the Central Prison of

Government Resolution, Judicial Department, No. 478 of 20th January 1902.

Hyderabad one unfit life-transport was released on the ground of "old age" and the unexpired portions of the sentences of two prisoners were remitted. One female prisoner was released from the Ahmedabad Central Prison on commutation of her sentence of transportation for life. Fifteen prisoners, whose offences were due to scarcity, were released on completion of half of their sentences. It will be observed from last year's report that 218 short term prisoners, sentenced for offences due to scarcity, were released in 1901 and 800 in 1900. The numbers and dates of Government Resolutions under which these prisoners were released are noted in the margin. The number of escapes shows a decline of 3. The number of executions increased from 37 in the year 1901 to 40 in the year 1902. Of the 295 prisoners who died during the year, which shows a decrease of 72 over the figures of 1901, 282 died in Prisons and 13 in the Subsidiary Jails of the 1st and 2nd Class. The number of Burmese prisoners at the close of the year under report was 45 and that of the State prisoners 3.

7. With reference to the figures appearing in the marginally noted statement it will be observed that there is an increase in the number of Europeans who were imprisoned during the year. The increase will be found in the House of Correction, Bombay, and at Aden and is probably due to a great number of offences committed under the Shipping Act.

Statement No. II.—Religion, age, education and previous occupation of convicts.

8. The number of juveniles received during the year under report shows an increase of 20 over the figures for the year 1901. Of these 11 were previously convicted. Of the 121 male and 49 female youthful offenders convicted during the year under report 76 males and 38 females were sentenced to one month and under, 36 males and 10 females to above one month and under six months, and 9 males and 1 female to over six months. All the heads under "Age" show a decline. Under the head "Education of convicts" the sub-heading "Able to read and write" shows an increase of 97, while the two remaining sub-heads show a decrease. With the exception of the sub-head "Persons engaged in agriculture and with animals" all the other sub-heads of "Previous occupation of male prisoners" show a fall. There is decline under all the four heads under females. The percentage of number admitted to free population according to the Census of 1901 is 0.187 in the year under report as compared with 0.200 in the year 1901.

9. There has been a marked increase under the head "sentenced to above one and not exceeding three months," a slight increase under the heads "above 1 year and not exceeding 2 years," "exceeding 10 years" and under

Statement No. III.—Nature and length of sentences.

the heading "sentenced to transportation for life as well as for term," while the other headings show a decline. The number sentenced to death has fallen from 73 in the year 1901 to 44 in the year under report. The increase under those sentenced to transportation is most marked in the prisons of Dhulia and Yeraoda. In the case of Yeraoda this is no doubt due to the fact that all prisoners from the Násik District are now sent to Yeraoda and not to Thána. There is an increase of 313 prisoners over the figures of the previous year in the number of prisoners sentenced to simple imprisonment, while those sentenced to rigorous imprisonment show a decline. Prisoners sentenced to rigorous imprisonment with solitary confinement have risen from 30 to 46. It is probable that the rise will be more marked next year as Courts appear to be now inclined to award this class of punishment. The number of those sentenced to rigorous imprisonment with whipping has risen from 159 in the year 1901 to 260 in the year under report. The latter fact was noticed in my report for 1901 in which year the number of previously convicted prisoners was greater than during the year 1902.

10. The number of habituais identified by the Jail officials after arrival in Jail has risen from 538 in 1901 to 655 in the year under report. 1,302 prisoners were classified by the Courts as habituais out of a total of 3,102

Statement No. IV.—Re-convictions.

previously convicted prisoners against 1,452 out of a total of 3,180 in the year 1901:—

		1900 ...	23,921	2,983	250	49	3,282	1,763

11. It appears from the information supplied by the Inspector-General of Police that there has been a substantial increase of 230 in the number of persons identified in the Bombay Presidency, exclusive of Sind, by means of finger tip impressions. Of the 425 persons thus identified, 61 were identified in Bombay, 49 in Yeraoda, 98 in Dhulia, 22 in Thána, 36 in Ahmedabad, 28 in Násik, 23 in Ahmednagar, 21 in Sholápur and the rest in other parts of the Presidency.

12. Five prisoners escaped from within the walls during the year under report against 8 in the year 1901. Of the 5 escapes 4 got away from the Dhárwár Prison, and one from the Karáchi Prison. Five prisoners got away from outside the prisons and jails against 16 in the year 1901. Of the 5 prisoners, 2 escaped from the working parties of the Thána Prison, 2 from the extramural gangs of the Hyderabad Central Prison and one from an out-door party of the Second Class Subsidiary Jail of Sátára. Of the 10 prisoners who escaped during the year under report, 4 have been recaptured. Three prisoners who had escaped during the previous ten years have also been recaptured during the year 1902.

	—	—

13. The statement noted in the margin relates to the offences committed by and the punishments awarded to convicts confined in the Prisons and Subsidiary Jails of First and Second Class. The offences dealt with by Criminal Courts have fallen from 23 in 1901 to 20 in the year under report as will be seen from the details given in the margin. This decrease is due to smaller number of escapes.

14. There is a decline in the number of offences committed by prisoners during the year under report as compared with the figures of the year 1901. The percentage of punishments to daily average strength during the year 1902 was 101·4 against 104·0 in the year previous. The offences relating to prohibited articles show an increase while the first, third and fourth heads of the following table show a decline :—

Offences dealt with—				1901.		1902.	
<i>By Criminal Courts</i>				23		20	
				Dealt with by minor punish- ments.	Dealt with by major punish- ments.	Dealt with by minor punish- ments.	Dealt with by major punish- ments.
<i>By Superintendents.</i>							
Relating to work	...	...	...	3,186	1,196	3,032	1,060

All other breaches of prison rules	...	...	...	3,368	1,028	2,948	677
Total ...				7,988	2,758	7,854	2,256

15. The following table shows the punishments inflicted during the year 1902 as compared with the figures of the year previous. From this statement it would appear that the total number of minor and major punishments awarded by the Superintendents was 10,195 and the total number of offences was 10,110. This difference is due to 85 offences having been dealt with during the year 1902 by the award of combined punishments.

Punishments inflicted—					1901.	1902.
<i>By Criminal Courts ...</i>					23	20
<i>By Superintendents.</i>						
Minor.	Warnings	...	...	...	1,785	1,650
	Penal diet	...	...	...	789	978
	Separate, cellular and solitary confinement	...	...	...	258	200
	Hand-cuffing and link fetters	...	...	...	1,454	1,610
	Other punishments	...	...	...	3,756	3,482
Total					8,042	7,920
Major.	Separate, cellular and solitary confinement	...	...	...	412	314
	Penal diet with solitary confinement	...	...	...	130	129
	Fetters and hand-cuffing behind or to a staple	...	...	...	1,760	1,209
	Corporal punishments...	...	...	...	141	129
	Combinations or minor punishments	...	...	...	111	177
	Other punishments	...	...	...	219	317
Total					2,773	2,275
Grand Total					10,838	10,215

16. Of the 10,195 punishments dealt with by the Superintendents of Prisons and Jails, 7,920, or 78 per cent., were minor punishments and 2,275 or 22 per cent., belonged to the major class. Under minor punishments "Warnings", "Separate, cellular and solitary confinement" and "Other punishments" show a decline, while "Penal diet" and "Hand-cuffing and Link-fetters" show an increase. Referring to the figures of major punishments "Combinations of minor punishments" and "Other punishments" show an increase, while all the other remaining heads show a decline. Corporal punishments have fallen from 141 in 1901 to 129 during the year under report. The decline in the offences and punishments is most marked in the Central Prison of Yeraoda and in explanation of this decline the Superintendent writes: "The general behaviour was good. The number of warnings remain constant as this is a form of punishment which meets the requirements of many cases. It is interesting to note that the rate of punishments has been increased in the minor and decreased in the major form. This, though a step in the right direction, must not be lauded if it is secured with a relaxation of the discipline required in this large Jail." Other causes have contributed to this decline in punishments at Yeraoda. The daily average population has declined, a new Superintendent was in charge of the Prison for half the year, which must always make a difference in the number and class of punishments inflicted, and lastly more prisoners have been placed in the printing press consequent on the increase of work there. Press work is not as irksome as other forms of hard labour and the natural result is that punishments fall off.

17. The subjoined table furnishes particulars as to the number of stripes inflicted on prisoners during the year 1902 as compared with the figures for the year 1901:—

	1	2	3						4	5	6			
			Total number of prisoners punished by whipping.								Percentage of column 3 to column 1.	Percentage of column 3 to column 2.	Number of prisoners in whose case (a) Death or (b) Illness was directly or indirectly the effect of corporal punishment.	
													(a) Death	(b) Illness.
	* Total number of male prisoners for the year.	Total number of Prison offences.	5 to 10 stripes.	Above 10 to 15.	Above 15 to 20.	Above 20 to 25.	Above 25 to 30.	Grand Total.						
Total ...	1901 ...	25,872	10,595	3	32	59	26	21	141	0.5	1.3	...	...	
	1902 ...	24,344	9,972	13	30	39	26	21	129	0.5	1.3	...	...	

* The figures exclude the number of prisoners moved from Prison to Prison within the Department.

18. During the year under report 6,200 prisoners wore fetters, compared with 8,084 in the year 1901.

19. *Mark System.*—A reference to the figures appearing in Statement C appended to this Report would show that 2,553 prisoners were released during the year 1902 under the remission system as compared with 2,197 in the year 1901. This increase is due, as explained in paragraph 6 of this report, to the inclusion in the mark system of prisoners committed to the prisons for failing to furnish security. The percentage during the year 1902 of those released under mark system to the total number who might have been released under that system, if of average good conduct up to the date of release, was 99.1 against 99.5 in 1901. The practice of mustering all prisoners and reading and explaining to them the benefits of the mark rules has been continued during the year under report.

20. The average number employed as Prison Officers during the year under report in our Prisons and 1st and 2nd Class Subsidiary Jails was 1,015 males and 12 females against 1,014 males and 14 females during the year 1901. From this it will be seen that there is very little difference between the figures of the past two years, although the total number employed during the year under report as Prison Officers show a decline, the figures for 1902 being 1,554 males and 18 females as compared with 1,735 males and 15 females in the year 1901. The number of punishments awarded to this class of prisoners shows a decline of 154 over the figures of the year previous, and this decline is most marked in the Central Prison of Yeraoda.

21. The statement quoted in the margin shows the different diet scales in use in the Prisons and Subsidiary Jails of the First and Second Class in this Presidency. These scales have been found to work satisfactorily. Such changes as have been made during the year 1902 have been noted in the fifth column of the statement.

22. The statistics of under-trial prisoners confined into Prisons, Subsidiary Jails and Lock-ups are given in the marginally noted statement. The number of prisoners admitted during the year 1902 shows an increase of 4,442, both sexes, the figures for 1902 being 68,665 against 64,223 in the year 1901. The admissions during 1902 of this class of prisoners in our District Prisons and First and Second Class Subsidiary Jails have been actually less, while Third Class Subsidiary Jails and Lock-ups exhibit this large increase. For this increase the Lock-ups situate in the Town and Island of Bombay are mostly responsible, where the figures have run up from 20,701 in 1901 to 24,571 during the year under report. The cause of this increase is attributed to the increased activity shown by the Bombay Police in taking up street obstruction cases under the Police and Local Acts.

23. The number of escapes during the year 1902 has been 24 against 17 in the year previous. Of the 24 prisoners, 1 escaped from the Prison of Dhárwar, 1 from the Subsidiary Jail of Ahmednagar and 22 got away from Third Class Subsidiary Jails and Lock-ups and are distributed as follows:—

Third Class Subsidiary Jails.

Hyderabad District	...	...	* 5
Lárkána District	...	...	1

			—
			1
			—

24. Thirty males and 1 female died during the year under report against 50 males and 1 female in 1901. Of the 31 deaths, 3 occurred in District and

Central Prisons, 4 in the First and Second Class Subsidiary Jails and 23 males and 1 female in the Third Class Subsidiary Jails and Lock-ups. Of the figure 31, 1 died in the Central Prison of Hyderabad and 1 in the Prison of Karáchi and 1 in the Prison of Dhárwár. One death occurred in the Second Class Subsidiary Jail of Umerkot, 1 in Broach and 2 in Ahmednagar. Of the remaining 24 deaths which took place in the Third Class Subsidiary Jails and Lock-ups, 5 males and 1 female died in the Third Class Subsidiary Jails in the Kaira District, 2 in the Násik District, 2 in the Khándesh District, 1 in Karáchi, 1 in Sukkur, 1 in Lárkhána, 1 in Kolába, 1 in Kánara and 1 in Poona Districts. Among the Lock-ups, 2 deaths occurred in the Lock-ups situate in the Ahmedabad District, 1 in Broach, 1 in Poona, 2 in Khándesh and 2 in Dhárwár.

25. The number remaining on 31st December 1902 was 161 males and 8 females in Prisons, 61 males and 8 females in the First and Second Class Subsidiary Jails, and 750 males and 56 females in Third Class Subsidiary Jails and Lock-ups, thus making a total of 972 males and 72 females.

26. *Civil Prisoners.*—In the beginning of the year 1902 there were 105 male and 1 female prisoners, 1,179 males and 1 female were received during the year, 1,144 males and 2 females were released. One male prisoner died in the Civil Jail of Karáchi, thus leaving a balance of 139 males at the close of the year 1902. The total cost and the cost per head have fallen from Rs. 6,932-7-3 and Rs. 88-14-0 in 1901 to Rs. 6,468-14-2 and Rs. 75-3-6 respectively. This decline is due partly to the non-payment of grain compensation to Civil Jail warders owing to the cheaper prices of food-grains and to the higher average number confined.

FINANCIAL.

27. The marginally noted statements refer to the gross expenditure incurred in the Central, District and Extramural Prisons and the Subsidiary Jails and Lock-ups, on account of convicted and under-trial prisoners. As usual the cost of Police Guard has been omitted and the realization from the sale-proceeds of garden produce deducted from the total charges. The gross expenditure during 1902 has been Rs. 8,06,439, and the cost per head Rs. 70-0-4 as compared with Rs. 8,78,446 and Rs. 73-12-2 in the year 1901. The number of admissions having fallen the total expenditure has been less. No compensation was paid to contractors during the year under report.

28. The marginally noted head shows an increase of Rs. 6,222, which is due to the allowances paid to the Acting Inspector-General during my absence on privilege leave, to the annual increment allowed to me, to the increase of pay granted to the Superintendent of the Deccan Gang, and the increase in the clerical and warder staff of that gang as well as in the establishment of the Yeraoda Printing Press.

29. The cost per head of Dietary Charges has fallen from Rs. 39-5-10 in 1901 to Rs. 33-14-5 in the year under report, due partly to the cheaper rates of provisioning contracts and partly to no compensation having had to be paid to the contractors. During the year under report the contracts for provisioning Prisons and Jails were again taken for short periods, and this has resulted in a saving of Rs. 4,758 to Government during the last three months of the year.

30. The value of vegetables and other supplies has fallen from Rs. 25,462-1-5 in 1901 to Rs. 17,221-5-8 in the year under Report. This decline is due in the Ahmedabad Central Prison to the destruction of garden crops by locusts and rats and partly to the want of water towards the close of the year. In the Yeraoda Central Prison one of the large gardens had to be given rest for about five months and heavily manured. There was a deficiency of water here also. The garden crops in the Kárwár Prison were destroyed by heavy rain, and locusts as well as heavy rain destroyed a major portion of the crops in the Hyderabad Central

Prison. It will be thus seen that the crops in the principal gardens failed. The gardens at Rájkot, Shikárpur, the Sind Gang and Bhusával were more profitably worked than last year.

31. Both the total cost and the cost per head show a decline. The total cost has fallen from Rs. 40,319 in 1901 to Rs. 32,773 in the year under report and the cost per prisoner has fallen from Rs. 3-6-2 to Rs. 2-13-6. This decline is due, in a great measure, to the decrease in sickness in our Prisons and Jails.

32. The expenditure under this head shows an increase of Rs. 3,578. The cost per prisoner has increased from Rs. 2-10-1 to Rs. 3-0-5. This increase is partly due to a larger average number of prisoners confined in the gang, where on account of the nature of the work the wear and tear of clothing is greater than in a District Prison. The increase in the three Central Prisons of Yeraoda, Ahmedabad and Hyderabad is due to a much larger renewal of clothing and bedding.

33. There is a rise in Sanitation charges, both in the total expenditure and the cost per head, the figures for 1901 being Rs. 22,238 and Rs. 1-13-10 against Rs. 23,288 and Rs. 2-0-4 in the year under report. In the House of Correction, the increase is due to the water charges for the year 1901 having been paid during the year under report. This was anticipated, *vide* paragraph 33 of my report for 1901. In the Ahmedabad Central Prison the increase is accounted for by the erection of two new temporary barracks and to the purchase of disinfectants on account of the outbreak of Cerebro-Spinal fever.

34. Although the total expenditure under this head is smaller during the year under report as compared with the figures of the previous year the cost per head has increased from Rs. 1-13-4 to Rs. 1-14-1 due to a smaller average number of prisoners confined during the year under report. Looking to the individual statistics of our prisons it appears that the expenditure in the House of Correction has increased owing to the transfer of prisoners to the Ratnágiri Prison. The rise in the Deccan Convict Gang is due to a much larger number of prisoners having been transferred thereto from several Prisons situate at a considerable distance from the present camp. The cost of transfers to a Gang is debited to the accounts of the Gang to which the prisoners are sent and not to the transferring Prison.

35. The increase under this head of Rs. 3,216 is due in the Common Prison to a larger number of convict officers who were released during the year to whom gratuities were paid. The increase in Yeraoda is partly due to a similar cause and partly to the supply of uniforms to warders. In the Deccan Gang the increase is attributable to the same causes. The increase in Dhárwár, Karáchi, Hyderabad and the Sind Gang is due to the supply of uniforms to the warder staff. The sub-heads "Execution charges and other miscellaneous charges" show a decline. The cause of the latter is due to the Deccan Gang not having moved its camp during the year under report and the move of the Sind Gang having cost very little money.

36. The expenditure under this head has risen from Rs. 2,358 to Rs. 3,003. This increase is accounted for by the transfer of Jailors and other Jail subordinates from the Prisons of Yeraoda, Dhulia, Bijapur, Dhárwár, Kárwár, Ratnágiri and Aden and an increased expenditure under "Inspection and general superintendence."

37. This head shows an increase of Rs. 1,482 over the figures of the year 1901, and is due, in the House of Correction, the Prison of Dhulia, the Deccan Gang and the Ahmedabad Central Prison to the increased expenditure for service postage stamps. The expenditure for service postage stamps in Yeraoda has increased from Rs. 360 in 1901 to Rs. 832 in the year under report. This increase is due to the expenditure for service stamps required for the Quinine Industry and the Printing Press having been transferred, under orders from the Accountant General, Bombay, from the

factory account to this head. The increase under rent, rates, and taxes is due to the payment of rent for the building in which my office is located for the full period of one year against two months of the year 1901.

38. This head shows a decrease of Rs. 2,163 in the total expenditure and of Re. 0-2-6 in the cost per head. The sub-heads "Conservancy and water-supply dead stock" show a large increase which is principally due to the purchase of dead stock articles for the Deccan Convict Gang to meet the increased requirements. The increased expenditure under "Arms and accoutrements" is in a great measure due to the supply of additional arms to the Deccan Gang and partly to the cost of arms supplied to the Prisons of Kárwár and Ratnágiri and to our 1st and 2nd Class Subsidiary Jails having been adjusted during the year under report. The increase of Rs. 321 under "Draught cattle" is due to the purchase of bullocks for the use of the Yeraoda Prison garden. There is a large decrease under the head "Other miscellaneous dead stock" as no tents were purchased during the year under report.

39. In Prisons the average number of prisoners sentenced to labour has declined from 9,833 to 9,447 and in 1st and 2nd Class Subsidiary Jails there is an increase of 5 only over the figures of the year previous. The percentage of sick and convalescents in Prisons has fallen from 7·4 to 6·8, and in 1st and 2nd Class Subsidiary Jails from 6·7 to 5·8. There is a decline in the average number not employed for other reasons due to a comparatively smaller number of admissions into our Prisons of prisoners requiring to be quarantined. There would have been a further decline under this head had not the Sind Gang moved its camp in June 1902, from Bhiria Road to Pad Idan. During a move of this sort the convicts are shown as not employed. The average number employed on unremunerative labour in our Prisons has fallen from 724 to 402 and this decrease is due in Bijápur to the reduction from 111 to 70 in the number of prisoners employed free of charge in cleaning and levelling the ground in the City. The Deccan Gang having obtained remunerative labour throughout the year for its prisoners the average number on unremunerative labour therein has fallen from 58 in 1901 to 1 in the year under report. The number of "Prison officers" has remained nearly the same both in Prisons and Subsidiary Jails. The number employed in Prisons as "Prison servants" shows a very slight increase. On account of a comparatively smaller average number of prisoners, the number employed in "gardening" as well as in "grinding grain, etc.," shows a decline. The number employed on "Jail buildings" shows an increase, due to the erection of new barracks for the Sind Convict Gang and to the construction of additional barracks for the Deccan Gang. The number employed on manufactures in our Prisons and Subsidiary Jails is nearly the same while the increase under "Extramural labour" is chiefly due to the increased strength of the Deccan Convict Gang. As stated in the earlier portion of this paragraph 70 prisoners were daily employed throughout the year in the Prison of Bijápur in cleaning and levelling the ground in the City, and the earnings of these prisoners if paid for at the rate of 2 annas per head per day would have amounted to Rs. 2,739.

40. The marginally noted statement shows the net cash earnings of convicts sentenced to labour. The cash earnings during the year under report have been Rs. 83,248-14-0 against Rs. 1,07,566-8-0 in the year 1901. These earnings would have been larger had it not been for the nominal loss of Rs. 13,444 in the Yeraoda Central Prison.

41. In regard to this loss I would explain that the cash earning appearing in column 11 of Statement No. XII is the difference between the amount drawn from and paid into the Treasury (inclusive of adjustments and cash in hand at the opening and close of the year) without taking into account the liabilities and assets of a prison factory. The Yeraoda Press accounts are kept up on the same lines as the Prison accounts as the printing operations are taken as part of the factory industry. For the purpose of explaining I would separate the factory, with its quinine industry, from the Press transactions. To deter-

mine the state of affairs correctly the following items, both at the opening and close of the year, should be accounted for in the manner usually done in Appendix E. This appendix is not supplied to Government but its want has been felt and the Government of India propose to introduce a statement on nearly the same lines (*vide* C-Finance, Statement No. XVI, of the Provisional Statements, forwarded to this office under Judicial Department Endorsement No. 1135, dated 27th February 1903)—

1. Cash in hand.
2. Manufactured articles.
3. Raw materials.
4. Amount of outstanding debts due to the Prison.
5. Do. do. by the Prison.
6. Plant and Machinery.
7. Amount drawn from the Treasury, inclusive of the value of articles supplied from the factory and of the stores received from England.

If the above items be taken into account it would appear that instead of a loss the Yeraoda Prison factory has earned Rs. 7,990 exclusive of the outturn of the Press.

42. With regard to the Printing Press, Government are aware that our press has undertaken the printing and distributing of half the Standard Forms formerly supplied by the Government Central Press, Bombay. This has necessitated heavy expenditure on plant and machinery (Rs. 12,537) as well as paper (Rs. 41,677) for printing forms. In addition to these, printed stock of the value of Rs. 14,732 has been received from the Government Central Press, and all these items are debited during the year 1902 against the printing industry. In due course the paper will be turned into forms, and supplied to the Indenting Officers along with the printed stock received from the Government Central Press, and when this is done their value will be credited to this press. If the seven items mentioned above were taken into account to ascertain the result of the working of the printing industry it will appear that the press has made a profit of Rs. 43,345. From what I have stated above Government will see that the factory and the printing operations have not really been worked at a loss in the Central Prison of Yeraoda as shown in the statement.

43. In making comparisons we have to accept the figures in statement No. XII. Of the amount of Rs. 83,249, Rs. 20,704 represent the profits of factory operations, Rs. 60,802 of extramural labour, and Rs. 83 for convicts hired to contractors for employment on Prison buildings. Rs. 1,660 were earned by our 1st and 2nd Class Subsidiary Jails. Comparing the figures for the year under report with those of the year previous it appears that the earnings in the Common Prison, Bombay, the Prisons of Dhulia, Dhárwár, Thána, Ahmedabad, Hyderabad and Shikárpur have gone up while those in the House of Correction, the Prisons of Bijápur, Kárwár, Ratnágiri, Rájkot, Karáchi and Aden have gone down more or less. The decline in the House of Correction, the Prisons of Kárwár and Rájkot is attributed to the fall in the demand for jail-made articles. In Karáchi it is said to be due to the falling off in the demand for sand. The decline in Aden is assigned to the Somaliland Protectorate having obtained its forms from Bombay instead of from the Prison Press. In the Prison of Bijápur a fewer number of prisoners were employed on manufactures as a comparatively larger number of prisoners had to be employed in manufacturing clothing for the Deccan Convict Gang. The average cash earning per head of the number employed on manufactures, inclusive of extramural employment, has fallen from Rs. 34-12-0 in 1901 to Rs. 24-15-0 in the year 1902.

44. During the year under report jail-made articles amounting to Rs. 11,599 were sold to Government Departments against Rs. 10,269 in the year 1901. No articles were supplied to the Commissariat Department, while those supplied to Public Works Department, Telegraph Department, Marine Department and Military Department show a decline. From this it will be seen

that the heading "Other Civil Departments" only shows an increase, and it is this increase which has contributed towards the increase in the year under report. The figures for 1902 are—Public Works Department, 825; Telegraph, 788; other Civil Departments, 8,255; Marine Department, 1,585; and Military Department, 146.

45. In the month of June 1902 this Gang moved its camp from the Bhiria Road Station to the Pad Idan Station in the Hyderabad District. With an average population of 353 prisoners the Gang has earned Rs. 17,552, against Rs. 23,201, with a population of 438 prisoners. As already reported to Government, the Gang is expected to complete its work in the present camp in the month of June next.

46. During the year under report Government sanctioned the enlargement of this Gang from 500 to 1,200 prisoners. The average number confined therein in the year 1902 was 905, who earned Rs. 25,337, against Rs. 18,895 with an average population of 523 prisoners in the year 1901.

47. The profits in the year under report of the Quinine industry in the Central Prisons of Yeraoda and Hyderabad have amounted to Rs. 2,909 against Rs. 2,269 in the year 1901. Quinine packets of the value of Rs. 15,708 were sold to the general public during the year under report, against Rs. 16,451 in 1901 and Rs. 9,383 in 1900.

48. With some difficulty, due to want of house accommodation, I arranged that this Department should take over from the Government Central Press, Bombay, the printing and distributing of half the Standard Forms.

49. The following figures indicate what strides have been made by this Press during 1902. The requirements of the Jail Department, which as usual have been supplied by the Prison Press, are not accounted for below :—

Magisterial and Police and Judicial Forms printed in four languages	...	...	7,837,272
Magisterial and Police and Judicial Books printed in four languages	...	...	13,867
Stock envelopes printed for supply	...	...	4,081,225
Special envelopes	...	...	1,034,610
Deccan Agricultural Relief Act Forms	...	...	405,980

Forms and Books printed and bound for the Registration Department.

Forms printed in four languages supplied up to 31st December 1902	...	...	32,600
Books printed, bound and supplied in four languages	...	...	2,132
Guard Books supplied to above Department	...	...	1,300
Guard Books supplied to the Stationery Department	...	...	400
Blank Books bound and supplied to the Stationery Department.	...	...	400

50. The plans and estimates for a Press building are now in the hands of Government, and it is hoped that funds for its erection will be forthcoming in the near future.

51. The marginally noted statement shows the total cost of maintenance of all Prisons, Subsidiary Jails and Lock-ups. The total expenditure, excluding "Inspection and General Superintendence" has amounted to Rs. 7,68,462 in the past against Rs. 8,47,649 in the preceding year—a decline of Rs. 79,187. The total cash earnings have been Rs. 83,249 against Rs. 1,07,506, thus making the total net cost to Government of Rs. 6,85,213 against Rs. 7,40,083 in 1901. The average net cost per prisoner during the year 1902 has been Rs. 59-8-0 against Rs. 62-2-0, or a decrease of Rs. 2-10-0 over the figures of the preceding year.

Statement No. XIII—Net Cost,

Vital.

52. The statement noted in the margin deals with the sickness and mortality amongst prisoners of all classes during the year. With a daily average strength of 11,602 prisoners confined in Central, District, Special and Extramural Prisons, Subsidiary and Civil Jails and Lock-ups there have been 7,916 admissions into hospital. The daily average number of sick has been 326.9 and the total number of deaths has been 327, or a ratio of 28.2 per mille of average strength. For the year 1901 the figures stood as under:—Daily average strength, 11,987; admissions into hospital, 11,555; daily average sick, 405.5; total number of deaths, 419, or a ratio of 35.0 per mille of average strength.

53. The subjoined table shows the capacity of the several prisons, together with the daily average number and the maximum number on any one day. During the year under report two temporary barracks, capable of holding 75 prisoners each, were erected in the Yeraoda Central Prison, thus raising its accommodation from 1,430 to 1,580 prisoners. On account of additions and alterations in the Aden Prison the holding capacity of that prison has gone up from 77 to 84 prisoners.

No.	Prisons.	Capacity, inclusive of Hospital and Cell accommodation.	Daily average.	Maximum Population.
1	Common Prison ...	180	493	702
2	House of Correction ...	262	365	469
3	Yeraoda ...	1,580	1,698	1,867
4	Dhulia ...	234	681	831
5	Bijápur ...	294	408	506
6	Dhárwár ...	336	537	581
7	Kárwár ...	252	249	283
8	Ratnágiri ...	228	170	212
9	Thána ...	730	729	813
10	Ahmedabad ...	920	1,382	1,526
11	Rájkot ...	102	146	167
12	Karáchi ...	412	313	399
13	Hyderabad ...	665	859	1,103
14	Shikárpur ...	483	500	604
15	Aden ...	84	44	59
Total ...		6,912	8,574	10,122

54. It will be seen from the above table that, looking to the daily average number, 9 out of the 15 prisons were overcrowded throughout the year under report. Of these nine prisons which were overcrowded the only two which show a ratio of above 33.3 per mille are the House of Correction (41.1) and the Central Prison of Ahmedabad (60.0). The two Extramural Gangs were not overcrowded, and the ratio of deaths per mille of average strength in the Deccan Convict Gang was 28.7 and that in the Sind Gang was 56.7. Out of the six prisons which were not overcrowded, the Central Prison of Hyderabad (36.0) and the Special Prison of Thána (34.0) exhibit a ratio of mortality in excess of 33.3 per mille of average strength.

55. Every endeavour has been made to terminate the overcrowding as far as possible by transfers, by utilizing tents, work-sheds, temporary sheds and other accommodation available in the prisons. The year under report opened with a population of 9,834 prisoners in prisons and 528 in 1st and 2nd Class Subsidiary Jails, and closed with 9,361 prisoners in prisons and 428 in Subsidiary Jails of the 1st and 2nd class.

56. From the figures in connection with the sickness and mortality amongst convicts and under-trial prisoners confined in prisons during the past

two years, it will be seen that, with the fall in the daily average strength during the year under report, the daily average of sick has declined from 377·3 in the year 1901 to 304·7 in the year 1902. The ratio per mille of deaths to daily average strength has fallen from 36·2 to 29·0, while that of admissions into hospital has risen from 36·3 to 44·5. The number of deaths has fallen from 370 to 285.

House of Correction.—Of the 15 prisoners who died during the year, 5 deaths occurred from diarrhoea, 4 from plague and 3 from tubercle. The Medical Officer remarks that the sickness and mortality was due to climatic causes. If the 4 deaths which were due to plague be not taken into account, the ratio of deaths per mille of average strength will come to 30·1.

Ahmedabad Central Prison.—Of the 84 deaths which took place during the year, cerebro-spinal fever was responsible for 37, tubercle for 11, and pneumonia for 8. If deaths which were due to cerebro-spinal fever and to pneumonia were to be deducted, the ratio per mille of average strength would fall to 27·9. A special report was submitted in connection with the outbreak of cerebro-spinal fever, which led to Government calling for plans and estimates to improve the sanitary condition of the prison, *vide* Judicial Department No 7675 of 1902.

Sind Gang.—Of the 20 deaths which took place in the Sind Gang, 14 were due to pneumonia against 49 in the year 1901, *vide* the correspondence ending with Judicial Department No. 2236 of 1st April 1902. In this connection I would add that the suggestions of the Surgeon-General with the Government of Bombay have been given effect to and barracks with improved ventilation were built at the present camp of the Gang at Pad Idan. Excluding the 14 deaths from pneumonia, the ratio per mille of deaths to average strength falls to 17·0.

Hyderabad Central Prison.—Deducting the 13 deaths due to pneumonia from the total of 31, the ratio of deaths per mille of average strength would fall to 20·9. In connection with the mortality the Medical Officer remarks:—“The increase in mortality occurred chiefly at the end of the year. Many prisoners were debilitated by scurvy about September and October before a supply of vegetables had grown up, and during November and December much pneumonia was contracted by prisoners throwing off their outer coats during the nights. Many of these latter had previously been pulled down by the antecedent scurvy.”

Thána Special Prison.—Of the total deaths (25), 7 occurred amongst prisoners who had been received from above-gháts, *i. e.*, principally from Násik. These prisoners are now sent to the Yeraoda Central Prison as reported in paragraph 54, sub-paragraph “Thána Special Prison,” of my report for the year 1901. Of the 25 prisoners who died during the year under report, 11 were due to tubercle, 4 to diarrhoea and 1 to plague. The Medical Officer remarks:—“The chief factor in the causation of disease and mortality is climatic. But prisoners are also admitted in weak state of health and are soon attacked with disease incidental to unhealthy condition of prison life. Out of the total number of 25 deaths during the year under report, 8 occurred among convicts who were admitted in weak and 14 in fair state of health.”

Deccan Convict Gang.—There was an outbreak of relapsing fever during the year which was reported to Government in this office letter No. 7403 of 14th October 1902. The ratio per mille of deaths to average strength was 28·7.

57. During the year under report there were 24 cases of plague in our prisons of which 12 proved fatal. Out of 16 cases, which occurred in the Bombay Prisons and which were removed for treatment to the Arthur Road Hospital, 9 proved fatal. In the Prison of Dhulia there were 4 cases and 1 death. Of the two cases which took place in the Dhárwár Prison, one recovered and one was discharged otherwise. The single case in each of the Prisons of Thána and Karáchi proved fatal. In addition to these, one prisoner was attacked in the Sátára Subsidiary Jail and died in the Plague Hospital, where he was removed for treatment. With regard to the plague in the Thána Special Prison, the Medical Officer

remarks :—"Although precautionary measures had been in vogue since the previous year against the importation of plague into the Prison, one case of the disease occurred in March among the prisoners. The victim had been employed on flower garden work where one dead rat had been discovered a month before. The disease was then still prevalent in the town." In connection with the two cases of plague in the Dhárwár Prison, the Medical Officer notes :—"A few dead (plague) rats were found in the factory. All new admissions are inoculated the day of admission into Prison and the convicts in Prison are re-inoculated every six months. Of the two cases of plague which occurred, one was inoculated on 7th August 1902 (temperature re-action was 102·6°, 99·2°, 98·6°), was attacked by plague on 19th August and died on 21st August 1902. This prisoner has been accounted for as discharged otherwise. He was to have been released on 20th of August, but as he was too ill to be sent out he was detained in the Hospital. The second was an old convict in the Jail. He was re-inoculated on 13th June 1902 (temperature re-action was 101·2°, 99·8°, 99·2°), showed symptoms of plague on 4th July 1902 and was discharged cured on 5th September 1902." In connection with plague cases in the Prison of Dhulia, the Medical Officer remarks :—"Plague in an epidemic form occurred in the town of Dhulia from September to end of November. The prisoners were inoculated twice and luckily only 4 cases of plague occurred with one death. The fatal plague case was attacked on the 4th day after the inoculation. No ill-effect after inoculation was noticed amongst the prisoners."

58. With regard to the single case of cholera in the Thána Special Prison, the Medical Officer observes :—"A female prisoner developed genuine symptoms of cholera on the 20th July which did not prove fatal. It appeared that the evening meal of which she partook did not agree with her and caused symptoms of indigestion which passed into cholera. It must be added that the disease was then not prevalent in the town of Thána or the talukas of the District."

59. As stated in the earlier portion of this report, the ratio per mille of deaths to daily average strength in Central, Special, District and Extramural Prisons, during the year under report, is 29·0. If deaths which were due to plague, relapsing and cerebro-spinal fevers and pneumonia were to be excluded the ratio of deaths will fall to 17·7.

60. The following measures have been adopted during the year in some of our Prisons, Jails and the two Extramural Gangs with a view to improve the health of the prisoners :—

- (1) Issue of wheat and rice in lieu of bájri and jowári.
- (2) Issue of extra rations to weakly prisoners and convalescents.
- (3) Issue of an extra morning meal, consisting 2 ozs. of warm conjee, to prisoners of the Sind and Deccan Convict Gangs before they started to work. Issue of gur to the prisoners of the Deccan Convict Gang.
- (4) Issue of extra clothing to the weakly prisoners.
- (5) Free administration of Cinchona alkaloids and quinine whenever necessary in places showing tendency to malaria.
- (6) Inoculation by Professor Haffkine's prophylactic serum.
- (7) Issue of potatoes in lieu of green vegetables.
- (8) Reduction of working hours.

The above information is furnished in accordance with the orders contained in paragraph 1 of Judicial Department Resolution No. 9115, dated 29th December 1896.

61. There is a fall in the daily average strength, daily average sick and the death-rate in Subsidiary Jails and Lock-ups, notwithstanding the rise in the total population, as will be seen from the figures as under :—The daily average strength has fallen from 1,699 to 1,685 and the daily average sick from 28·2 to 22·2. The ratio of deaths per mille of daily average strength has declined from 23·3 to 24·3, while the total population has risen from 66,260 to 63,893.

62. From the figures appearing in the marginally noted statement it will be seen that malarial fever cases have fallen from 4,340 to 1,928, and this fall is most marked in the Central Prison, Yeraoda, where the number has gone down from 2,709 to 468. On this subject the Superintendent and Medical Officer writes:—"The Medical Officer has during the last year instituted a 'Quinine gang' to each one of whom is given 5 grains once a week, and the diminution in admissions is ascribed to this treatment. The gang include all men in outside gang, pump and chaki and every man, irrespective of work, who on admission is found to have an enlarged spleen. Special care is taken during periods—February-May, October-December—months during which ague prevails in the neighbourhood." No transfers from Dhárwár were made during the year and this, together with the more healthy season, contributed no doubt towards the great decline. Other general diseases show a decline of 479 over the figures of the last year. There is more or less a decline in all other diseases except "lung diseases" and "abscesses, boils, &c." The increase under "abscesses, boils, &c." is principally due to the increased number of prisoners employed extramurally in the Deccan Convict Gang who wore fetters.

63. 18,147 prisoners were released during the year, of whom 9,896 or in other words 54·5 gained weight against 57·2 in the year previous; 4,453 prisoners lost weight equal to a percentage of 24·6 against 25·5 in the year 1901. The number who remained stationary has risen from 17·3 in 1901 to 20·9 in the year under report.

OFFICIAL AND NON-OFFICIAL VISITORS.

64. For 17 Prisons and 13 Subsidiary Jails of the 1st and 2nd Class there were 256 visitors during the year. 72 quarterly meetings were held and were well attended. 852 visits were paid to our Prisons and Jails by official visitors and 111 by non-official visitors.

BUILDINGS.

65. During the year under report the following allotments were sanctioned by Government:—

- Rs. 60,000 towards constructing the new Prison at Karáchi.
- „ 34,500 for the new Prison at Sukkur.
- „ 36,000 for increasing the accommodation of the Dhulia Prison.
- „ 3,000 for water service and bathing platforms in the District Prison of Dhulia.
- „ 3,600 for making additions and alterations to the male Hospital, Ahmedabad Central Prison.

A verandah round the central block in the yard of the Bijápur Prison was built at a cost of Rs. 1,500. Rs. 2,150 were allotted for making additions to and alterations in the contagious disease ward in the Thána Special Prison. The drainage of the Bijápur Prison was altered at a cost of Rs. 630. In addition to the above, a sum of Rs. 3,000 was allotted for discretionary grant to the Jail Department, and the whole of this amount has been expended.

MISCELLANEOUS REMARKS.

66. The following Prisons, Gangs and Subsidiary Jails were visited during the year under report either by Major Jackson or by myself :—

Central Prisons:	District Prisons.	Subsidiary Jails of 1st and 2nd Class.	Gangs.
Yeraoda. Ahmedabad. Hyderabad.	Thána. House of Correction. Common Prison. Karáchi. Shikárpur. Dhárwár. Bijápur. Dhulia. Rájkot. Ratnágiri. Kárwar.	Sholápur. Broach. Surat. Wadhvân. Bhusával. Ahmednagar. Sátára. Belgaum. Násik. Umarkot. Godhra.	Deccan Gang. Sind Gang.

67. Provision has been made in the plans and estimates for the erection of cubicles in the new Karáchi and Sukkur Prison projects, and I am at present under correspondence with Government and District Authorities with a view to introduce Mr. Leonard's system of cubicles which has worked very satisfactorily in several of the Prisons in Bengal.

I have the honour to be,

Sir,

Your most obedient servant,

H. N. ALEXANDER,

Inspector-General of Prisons,

Bombay Presidency.
